💡 PROJECTS

IFSC Code Finder

In "IFSC Code Finder" we use PHP and MySQL database. It has two modules i.e. User can visit the website and search for the IFSC code by using bank name, branch name, and Pincode/zipcode. Admin will be the user of this project who can control the whole website.

College Fee Management System

College Fees Management System project is developed using PHP, HTML, CSS, and JavaScript. Talking about the project, it has all the essential features. This project has an administration side from Where he/she can view branch, students, fees, report, manage fees, students, branches, settings. In this project, all the functions are performed from the Admin side which means there is no user side.
